WORK EXPERIENCE.

Working as a **QA Engineer** with **JDIT Business Solutions Pvt.Ltd.**

From November 2020 - Till date.

Project Name:

Loan origination System

Description : Lending or Borrowing Money in context for future repayment of the principal amount along with interest or other finance charges. LOS may be integrated with various System for END to END Cycle of Loan. Loan origination software is a platform for centrally managing and automating different stages of the loan servicing cycle, i.e. loan application, document verification and credit approval, with automated underwriting. Using loan origination software, businesses can process and approve loans faster. Here we worked on Personal loan and SME loan.

Internet Banking

Description : This project deals with banking application of users and employee. Bank provides 24*7 internet banking, online e-banking services to help manage finance from home or office simple and secure. It provides facility like Fund transfer, request for account balance as well as account statement. Wide range of online banking, personal banking, personal loans, fixed deposit, saving account and current account.

Role and Responsibility:

- Analyzed user business Requirements, system requirement specifications.
- Assisted QA Team Lead in Writing the Test Plans and Test Scenarios.
- Attended Business Meetings and co-coordinated with developers.
- Designing and executing test cases from the Functional specifications.
- Participated in the Test case review meetings.
- Performed Functionality Testing, Retesting and Regression Testing.
- Interact with developers to discussed technical problems, Bugs Tracking, Reports creation.
- Report the Regular Status to the higher authorities in a timely manner.
- Attend scrum meeting
